

The role of discussion in supporting Academically Productive Talk (APT)

The plan for the panel

- Why discussion in classrooms?
- Why did we develop Word Generation?
- How does it work?
- Adapting Word Generation for use in Mexico
- Adapting Word Generation for use in Brazil
- Another form of support for APT:
<https://www.academically-productive-talk.org/>

Well established fact

Classrooms with more discussion generate higher scores on literacy outcomes

Evidence concerning the role of discussion: Effect sizes

	Comprehension	Critical thinking
Collaborative Reasoning	0.262	2.465
Philosophy for Children	0.333	0.236
Paideia		
Questioning the Author	-0.205	2.499
Instructional Conversations	2.798	
Junior Great Books	0.333	0.718
Literature Circles	0.426	
Grand Conversations		
Book Club		

Well established fact

Discussion in classrooms is extremely rare

One possible solution: Curricular supports for discussion

- Engaging and discussable dilemmas
- Information to support claims about those dilemmas
- Activities and participation structures that authorize student voice
- All related to authentic literacy experiences – reading and writing to learn and communicate, not to practice reading and writing

Word Generation as one approach

What does it look like?

How does it work?

Theory of Change

- Engaging students in controversial issues

Word Generation
UNIT 1.05 considerable | contribute | demonstrate | sufficient | ...

This week's issue:
DOES RAP MUSIC HAVE A NEGATIVE IMPACT ON YOUTH?

Some people believe that rap music has a negative influence on children and teenagers. They claim that the lyrics are and especially insulting to women. They **contributed** to aggression among young people that disrespects women.

But is that a **valid** claim? Supporter songs **demonstrate** a different fact: the one we usually see on television think it's important for rappers' voices. People argue that violent individuals were probably violent before. Thus we can't blame rap for the others say that rap is a form of generation's poetry. They point positive images for today's youth.

However, some parents are concerned by rap and other music. Parents Music Resource Center label explicit songs and albums. Fans consider this a form of place in a free society.

Do you think that listening to rap has a negative impact on youth? Prepare to debate this issue. Use **sufficient** evidence in your writing.

Reader's Theater

Ms. Jackson: No, Shania. Benjamin Franklin wrote those words 250 years ago. He was talking about something very different, but today some people quote him in debates about whether we should give up our privacy so we can be safer. I was thinking of it because I just came from a meeting with the principal and the other teachers. The principal **perceives** a need to install video cameras to **monitor** the bathrooms, hallways, and the playground to keep our school community safer. I'm trying to decide what I think about this idea, and I wanted to find out how you all feel about it.

Darnell: Well, I think having cameras around is a great idea. You know, we've had a problem with bullies here in school. We're okay in our classrooms but not in places where the teacher's not watching. Video cameras could make us feel more **secure** everywhere in the school.

Shania: I don't think it's worth it, Darnell. When I'm with my friends in the hall, or outside the school, or combing my hair in the bathroom, I don't want someone watching me. I can't stand the idea that I'd have no privacy anywhere in this school.

Darnell: But school is really a public place. That's why they call it public school! It's not like being in your room at home.

Paula: If I were doing anything wrong, or even thinking about doing something wrong, I wouldn't want any video cameras in school. But as long as I'm not doing anything wrong, the cameras wouldn't bother me.

Day 1 secure • perceive • data • network • monitor • technology

Reader's Theater Do we need to give up our privacy?

Discussing Freedom and Security

On Monday, when the students in Ms. Jackson's class entered the room, they noticed that she had written something on the board: "Those who would give up essential Liberty, to purchase a little temporary Safety, deserve neither Liberty nor Safety." Some students raised each other what the sentence meant. Ms. Jackson's students were having trouble figuring out the line, but they realized it must be important.

1 **Shania:** Ms. Jackson, what you wrote sounds like a serious warning. Did we do something wrong?

2 **Ms. Jackson:** No, Shania. Benjamin Franklin wrote those words 250 years ago. He was talking about something very different, but today some people quote him in debates about whether we should give up our privacy so we can be safer. I was thinking of it because I just came from a meeting with the principal and the other teachers. The principal **perceives** a need to install video cameras to **monitor** the bathrooms, hallways, and the playground to keep our school community safer. I'm trying to decide what I think about this idea, and I wanted to find out how you all feel about it.

3 **Darnell:** Well, I think having cameras around is a great idea. You know, we've had a problem with bullies here in school. We're okay in our classrooms but not in places where the teacher's not watching. Video cameras could make us feel more **secure** everywhere in the school.

4 **Shania:** I don't think it's worth it, Darnell. When I'm with my friends in the hall, or outside the school, or combing my hair in the bathroom, I don't want someone watching me. I can't stand the idea that I'd have no privacy anywhere in this school.

5 **Darnell:** But school is really a public place. That's why they call it public school! It's not like being in your room at home.

6 **Paula:** If I were doing anything wrong, or even thinking about doing something wrong, I wouldn't want any video cameras in school. But as long as I'm not doing anything wrong, the cameras wouldn't bother me.

7 **Shania:** But even if I don't do anything illegal or wrong, I'd said something about a teacher or did something embarrassing—could they get that in the video? That sounds like an invasion of my privacy.

8 **Allie:** But Shania, you're always taking pictures of people and sending them around. Maybe you shouldn't be doing that if you care so much about privacy! I agree with you, though. What if somebody backs into the video network and lets our parents—or even complete strangers—watch us in school? **Technology** is great until it gets the wrong hands.

Reader's Theater continues on the next page.

Session 1 justify • monumental • surplus • architecture • infrastructure • hierarchy

Reader's Theater Spending Priorities

Setting: The school hall just out of Horace Mann Middle School, and two seventh-grade boys are waiting outside for their friends who took a detour to the restroom. The friends finally arrive.

Liam: The restrooms in this school are disgusting. The sinks are always clogged, there's gruff everywhere, and some of the toilets don't even flush. The locks on the stalls are all broken. You have to be a gymnast to go to the bathroom and hold the door closed. But now our school is going to build a new swimming pool because they had some extra money? They've got a problem with priorities. They should ask students how to spend the surplus!

Cyrus: And the worst of it, it's not just any swimming pool—they're talking about building the "best" swimming pool money can buy. How can they justify such a huge expense? I mean, it's not just the bathrooms that are falling apart. We've got classrooms with broken desks. We don't have art or music classes. I say spend the money on stuff we really need, not on a swimming pool.

Allie: Dude, a pool would be awesome! We could totally have it done for the swim team, since that's the local YMCA. And we'd be able to practice every day. I'm tired of our school always being left out of the big sports competitions. I mean, we're really good! Parents would come, and we could charge them to watch it. A ton of people came to see us. I bet we could pay back the cost of the pool. That would justify the expense, wouldn't it?

Cyrus: Look, only a few kids would use the pool—the athletes. You pay already for all the special buses. I mean, the school **hierarchy**, the principal and teachers might be at the top, but the athletes aren't far behind. This school supports athletes more than any other students. So, for those of us at the bottom, what good will a pool do? Why not use the money to fix the bathrooms? Or get some art and music teachers, or the other school clubs so that other kids could get some support too, maybe?

Heather: I have to admit the bathrooms are gross, but a pool is a great idea. Besides, it's not just for the athletes. Cyrus, the whole town would have access to it for certain days and times. Swimming is super good for you, and if ladies had access to a heated pool, getting exercise would be easier. But most of all, the pool would put our school on the map. It'd be the best swimming pool ever built in the county!

Cyrus: Yeah, sure. Think about what the pharaohs said: Build a huge pyramid and I can go on being a god and rule the one of you all over after I die. It will be good for you. But a lot of good at that **architecture** did the pharaohs Pyramids, temples, their **hierarchy**—what a waste.

Paula: Wait a minute, Cyrus. The Egyptians had a surplus to them? Building pyramids or going hungry. Remember Mr. Stokes going on about that land being so fertile they could grow more than enough to feed themselves? That surplus allowed them to do other creative things during the flood, like build great pyramids. And the pyramids are still one of the greatest wonders of the world. So what's the problem?

Cyrus: It was expensive to make people build those pyramids, and it was a big waste of money. They should have built something else that everyone could have used.

Liam: I agree with Cyrus. They should have spent their money on what the Greeks called "infrastructure." They know, canals, roads, all the stuff a society needs to run smoothly. Or in the case of our school, fixing our bathrooms or buying some new computers. Let's face it, those things are more important than building a pool no one really needs.

Heather: Everyone loves pools, and I'm sure that those Egyptians getting up all their **monumental** pool-encrusted pyramids with the golden light room didn't see burning in their dark almond eyes that that twenty years of laboring was completely **justified**.

Cyrus: Um, Cleopatra? Have you been spending way too much time watching the History Channel?

Heather: It's really that obvious?

Paula: In this week's social studies lesson, you will learn about the pyramids and temples of ancient Egypt. The thousands of peasants and craftsmen worked for years to build just one pyramid. That pyramid filled with gold, beautiful furniture, and jewelry. The building of the pyramids, and temples, and much of the surplus wealth the Egyptians produced, for more than what it took to feed and clothe all of the people.

As you learn about these **monumental** structures, think about these questions:

- ▶ How was Egypt's surplus wealth created?
- ▶ Why did Egypt use so much of the surplus to build the pyramids and other architecture?
- ▶ Was this use of that wealth **justified**? Were they wise or wasteful with their surplus?

Theory of change

- Promoting student talk, especially peer to peer talk (Applebee, Langer, Nystrand, & Gamoran, 2003)

TURN AND TALK

In September 2012, teachers in Chicago went on strike because they were unhappy with their working conditions. Strikers held up signs like the one in the picture (see left). If the workers who went on strike in Deir el-Medina had signs, what do you think they would have written? Write your messages in the signs below.

➤ WG units contain several discussion prompts that encourage students share their ideas and opinions

 **Discussion question:** How do you feel about being videotaped in school?

 **Discussion question:** Is it worth giving up some of our privacy to enjoy the connection that we get from belonging to social networks?

 **Discussion question:** Think about video cameras that exist in your community. Do you think they are helpful or harmful?

Day 1 secure • perceive • data • network • monitor • technology

Reader's Theater, continued Do we need to give up our privacy?

9 **Shunka:** Which is why I don't want other people taking videos of me. At least it's my choice what photographs I post on social media. I wouldn't have any control over the school video network.

10 **Affie:** You might feel like you're in control, but your phone collects data about you all the time. If someone stole your phone and then robbed a store, your phone's GPS would place you at the crime scene. That might seem crazy, but I watch the news and people misuse technology all the time.

11 **Ms. Jackson:** So, what do you all think Benjamin Franklin meant when he said, "Those who would give up essential Liberty, to purchase a little temporary Safety, deserve neither Liberty nor Safety?"

12 **Affie:** I think he meant we shouldn't give up our freedom just to be safe.

13 **Shunka:** And that freedom is worth more than security.

14 **Paula:** Maybe that to deserve freedom we have to be willing to take risks?

15 **Daniel:** Wait, privacy and liberty are not the same thing, right? Having a camera up doesn't mean I can't do the same things I would do if it weren't there.

16 **Shunka:** But I'll know a teacher could show my parents a video of me. I probably wouldn't act the same. So it would affect my freedom.

17 **Ms. Jackson:** There are great articles I wish I had video recorded this discussion.

18 **Shunka:** Ms. Jackson! That would have been an invasion of my privacy.

19 **Ms. Jackson:** I would have requested your permission first, huh?!

20 **Daniel:** (to Paula) Shunka, I think it would be great to video record discussions about topics like this.

21 **Ms. Jackson:** We're out of time. I've got to get you all to lunch. Let's talk about this more tomorrow during social studies class, okay?

22 **Paula:** Awesome! I love talking about freedom and security.

23 **Affie:** You are silly, strange.

24 **Paula:** Yes! But I'm free to be strange!

 **Discussion question:** How do you feel about being videotaped in school?

SEP 9 2015 Unit 5.6 118

Day 8 secure • perceive • data • network • monitor • technology

Article Do we need to give up our privacy?

Social Networks and Privacy

Today when we think of social networks, we think of Facebook, Instagram, or Twitter, but social networks have been around for almost as long as we have. As stated by author Francesco DeSisti in his 2013 book, *Friend and foe: How Social Networking in America*, "Social networks are groups of people connected by common interests and needs." Over many hundreds of years ago, people used social networks to share information about finding food and the best places to hunt and fish. Although they shared information mostly face-to-face, they also used writing and pictures to send messages. Communities can use social networks to stay connected, find resources, and keep their members secure.

In our world today, communication happens with the help of technology such as telephones and computers. Many young people first think of social media sites like Facebook, Instagram, and Twitter, though their grandparents are more likely to reach for a telephone or maybe even write a letter. People who use social networking sites are members of a growing social media community. Facebook alone has over 1 billion members.

One of those members is Emily, a sixth grader from Toronto, Canada. Emily spoke to Wired Generation reporters about how Facebook helps her stay in touch with friends she makes at summer camp. "Being online helps me to connect with different people that don't live in Toronto, rather than saying 'I'll see you next summer' and forgetting about them." Emily also enjoys the creativity that she has on social media. "Being able to express myself, designing my page, and uploading any pictures are other reasons I stay on Facebook."

Matthew, Emily's twin brother, opened an account on Facebook but recently decided to close it. "I deleted my account because someone hacked into it," Matthew told Wired Generation reporters. "What happened was that I wasn't checking my account very often and my friends told me that someone was writing me messages. My close friends knew it wasn't me." After Matthew closed his account the first time, his friends told him that they were still receiving the inappropriate messages. "I asked one of my friends who is a computer nerd to help me. We figured out that the hacker had my password. We changed my password to something really complicated and then we closed the account again. It's okay now." Matthew was upset because his privacy had been violated, and he never figured out who was responsible. "I had to send apologies to all my friends," Matthew recalled. "It was really embarrassing."

Many parents monitor how their children use the internet because they want to protect them from the risks of meeting people who had hidden online details on them and their friends. Not even if kids understand the risks, they can feel pressured to get online to stay in touch with friends. These days, making the choice between staying connected and protecting our privacy is a difficult dilemma!

 **Discussion question:** Is it worth giving up some of our privacy to enjoy the connection that we get from belonging to social networks?

SEP 9 2015 Unit 5.6 145

- In each WG unit, students work together in teams to prepare for a debate

Prepare to Debate

Do we need to give up our privacy?

Is it worth giving up our privacy to make our communities more secure?

For tomorrow's debate, your teacher will assign you to one of these positions:

Yes.

It is worth giving up our privacy to make our communities more **secure**.

No.

It is not worth giving up our privacy to make our communities more **secure**.

Today you will work in a team to prepare for the debate. Use the chart below to prepare to support your position and argue against the other team's position. Use evidence from the unit, other sources, and your personal experience.

Session 2 justify • monumental • surplus • architecture • infrastructure • rise

Building Background Knowledge

Striking Workers: Deir el-Medina (Set Mast)

The picture below shows the recently excavated remains of the ancient village Set Mast (now called Deir el-Medina), home to the scribes and artisans working on the nearby tombs. We know a lot about how the inhabitants of Set Mast lived from papyrus documents and inscribed pottery shards found in the ruins – these include receipts, prescriptions, magic spells, and even love songs! About 70 workers and their families lived in the village, in 3-5 room mud brick houses. Though these houses are simpler than Egypt's temples, tombs, and other monumental forms of architecture, the people who lived there were not peasants. They were skilled artisans – potters, carpenters, coppersmiths, sculptors, jewelers, and architects.

These workers helped design the tombs, carved sculptures, and made furniture and other beautiful objects to place in the tombs. Many were able to read and write. They were somewhere in the middle of Egypt's social hierarchy, well below the pharaoh and the officials, priests, and scribes, but much better off than the peasants.

The workers of Set Mast did everyone else, including during labor strikes. Sometime around 1862 B.C.E., grain supplies ran low. There were many building projects going on in Thebes and perhaps not enough grain rations for all the workers.

Also, sometimes corrupt officials stole grain from the rations to resell it. In any case, grain shipments to the workers at Set Mast suddenly stopped. To protest this unfair decision, the workers went on strike and refused to work until they were paid.

This event may well be the first recorded strike in history.

Take home messages

- Improving literacy in 10-15 year olds requires
 - Engaging questions that provoke interest
 - Opportunities for authentic discussion, as well as writing and reading
 - Robust curricular support
 - Extended implementation
 - Some basic level of fidelity
- Discussion in classrooms is very rare, yet very powerful as a stimulus to using new and more sophisticated language forms

Post-presentation discussion

- Another tool to support discussion in classrooms
- <https://www.academically-productive-talk.org/>
- <https://www.academically-productive-talk.org/archive>
- Guiding questions: what techniques does the teacher use
 - To ensure students understand the task?
 - To support clear expression of their meaning?
 - To ensure universal engagement?
- Good examples
 - Decompose Numbers: first five min
 - Phonics, language arts, min 7:20 till boredom sets in
